PROJECTS

JOBIFY

A fully responsive website, where You can add your jobs as an "Employer" or You can find your dream job as an "Employee".

I used "React" and "Node JS" for developing it, I also used "Mongo Db" for it's data base. Hope You Enjoy It

SMART BRAIN

A Website where you can put your images and only by one click it will recognize the faces in the image.

I used "React" and "Node Js" for developing this website and Data will

PROFILE

As a full-stack developer, I have always been passionate about creating efficient and precise solutions for any project that I work on. My expertise in React, JavaScript, Node.js, and MongoDB has enabled me to deliver exceptional results every time. I am committed to staying current with the latest technologies and techniques, which allows me to bring your ideas to life in the most effective way possible.

My journey into programming began when a friend suggested that I try developing codes due to my exceptional ability to solve mathematics tests. I started by learning JavaScript, and it quickly became clear that programming was my true calling. Since then, I have honed my skills in a variety of programming languages and databases, including PHP, Laravel 10, MySQL, Postgresql, and more.

As a full-stack developer, I have worked on a wide range of projects, from simple web applications to complex enterprise-level solutions. My attention to detail and commitment to quality ensure that every project I work on is delivered on time and to the highest possible standards.

If you are looking for a full-stack developer who can bring your ideas to life with efficiency and precision, look no further. With my expertise in React, JavaScript, Node.js, and MongoDB, as well as my experience with other programming languages and databases, I am confident that I can deliver exceptional results for your next project. Let's work together to create something amazing!

PROJECTS

REAL ESTATE

This Website is useful for Real Estates.

You can buy or sell or even rent properties and houses. The best benefit of using this website is that it has an "Admin Panel" which you can controll everything on this website(like: add agents and edit them, change the accessibility of each agent, add or delete properties and lots of other things you can imagin...)

Another cool amazing thing about this website is have a "Real Time Chat" which users can chat dynamically with agents. How cool is that...

At the end I've to say I used "Laravel 10" & "MySQL" + "JavaScript" for developing it.
Hope You Enjoy It.

ROBO FRIENDS

Do You Want To Have Some Robots??!! They Look Forward To Seeing You And Showing How Simply You Can Create Robo-Cards Only By using Pure "React".
